**FOR NATURAL GAS EMERGENCY VALVE REPLACEMENT**  
**7/6/2023 at 2:00PM**

1. In the packet for this project it states that TDW fittings are approved for your systems emergency valves and we would like to include those in our bid but wanted to check to make sure your company was ok with that?

All bids shall be submitted based on specified bid quantities identified in the Pipeline Construction Items that can be found in Section E, page 1 of the Bidder Form. Mueller fittings have been purchased to perform the line tapping and stopping. The fittings and materials that GUC will provide can be found in the Bill of Materials in Section G Appendix A of the contract. If the contractor would like to provide an exception to the bid the contractor shall list all exceptions or variations to the bid specification on the Exception Form located in Section E, page 3 of the bid.

The contractor shall refer to 4.2.2 "Hot Tap Fittings" of the Technical Specification for specific references associated with TD Williamson fittings.
