

# A Little Green Can Make Our State a Lot Greener

ncGreenPower

**Greenville** Utilities Commission (GUC) is pleased to offer our customers the opportunity to participate in NC GreenPower, a voluntary environmental program. Customers can purchase blocks of “green” power, which is cleaner energy generated through renewable energy resources such as wind, solar and organic matter. A customer’s tax-deductible contribution adds that much more green power to North Carolina’s electric power supply resulting in a healthier environment. Through NC GreenPower, all renewable energy resources used are located in our state.

GUC joins many other North Carolina municipal electric systems as well as Progress Energy, Duke Energy and the North Carolina Electric Cooperatives in this commitment to providing cleaner energy for North Carolina.

***How Does It Work?***

For each \$4 monthly investment made to NC GreenPower, a “block” of 100 kilowatt hours (kWh) of green power will be added to the North Carolina power grid.

---

NC GreenPower is an independent, nonprofit organization established to improve North Carolina's environment through voluntary contributions toward renewable energy. A landmark program approved by the NC Utilities Commission, NC GreenPower is the first statewide green energy program in the nation run by a non-profit organization and supported by most of the state's electric utilities.
