

GREENVILLE UTILITIES COMMISSION

ELECTRIC RATE SCHEDULE EG-4

LARGE GENERAL SERVICE – CP (E-INDLGS)

I. AVAILABILITY

This schedule is available for electric service used by a nonresidential customer where the Contract Demand equals or exceeds 750 kW or where the registered or computed demand equals or exceeds 750 kW for two consecutive months. Additionally, the availability of this schedule is limited to customers supplied at commonly metered points of delivery; delivery and metering of all service shall be at 7,200/12,470Y volts.

Customers receiving service under this schedule shall be responsible for furnishing, owning, operating, and maintaining all transformers, lines, and associated facilities located on the Customer's premises required to accept delivery from the Commission's nearest 7,200/12,470Y volt source. As an alternative, the Commission will furnish, own, operate, and maintain suitable transformers, lines, and associated facilities, exclusive of Commission generation facilities and systems, subject to an additional monthly charge to the Customer equal to 2.0% of the estimated new installed cost of such excess facilities.

This schedule is not available for resale service, or for short term or temporary service.

II. MONTHLY RATE

- A. Base Facilities Charge \$185.00
- B. kW Demand Charges:
 - All Coincident Peak(CP) Demand..... \$21.48 per CP kW
 - Allocated Non-coincident Peak (NCP) Demand \$10.38 per kW
 - All NCP Demand in Excess of Allocation..... \$ 8.27 per kW
- C. rkVA Demand Charge:
 - All rkVA Demand 25.000 ¢ per rkVA

Effective November 1, 2023
Supersedes Schedule dated July 1, 2023

Electric Rate Schedule EG-4
Large General Service-CP

D. Energy Charge:

All kWh2.705 ¢ per kWh

E. Interruptible Demand Charge:

All Interruptible Demand (less than 25 MW)\$10.59 per kW
All Interruptible Demand (greater than 25 MW)\$14.82 per kW

F. Minimum Charge: The minimum charge may be contracted for, but not less than the sum of the charges in A, B, C, D, and E above.

G. Sales Tax Charge: The applicable North Carolina sales tax will be added to all charges listed above, except billings to designated Federal and State agencies.

H. Purchase Power Adjustments: Coincident Peak and Allocated Non-coincident peak demand charges as well as all energy charges include a Purchase Power Adjustments charge set forth in the Electric Rider RR-4, Purchase Power Adjustments (PPA).

III. DEFINITIONS

Coincident Peak (CP) Demand - The Coincident Peak (CP) Demand shall be Customer's contribution to the Commission's 60-minute clock-hour kW demand measured during the 60-minute interval which is used by the North Carolina Eastern Municipal Power Agency (NCEMPA) for wholesale billing purposes during the current calendar month. The associated rate of charge shall be equal to the total demand rate charged to the Commission by NCEMPA for Coincident Peak (CP) Demand plus a 1.20% adjustment for the Customer's contribution to total system losses. This charge shall be automatically adjusted to track changes in the rates charged the Commission by NCEMPA.

$$\text{CP Demand Rate} = \text{NCEMPA CP total demand rate} \times 1.012 \times 1.0$$

Where the Coincident Peak period initially identified by NCEMPA is changed, the Coincident Peak (CP) Demand of the Customer during the corrected period shall be used for billing and a corrected bill rendered as necessary.

Non-Coincident Peak (NCP) Demand

Allocated NCP Demand – The Allocated NCP Demand is the first block of non-coincident demand charges applicable to the Customer's maximum 15-minute demand recorded or contracted during the current billing month. For qualifying existing customers, Allocated NCP Demand shall be determined by historical usage for the service. For qualifying new customers receiving service for the

Effective November 1, 2023
Supersedes Schedule dated July 1, 2023

Electric Rate Schedule EG-4
Large General Service-CP

first time, Allocated NCP Demand shall be as contracted for. The associated rate of charge will be automatically adjusted under the Electric Rider RR-4, Purchase Power Adjustments (PPA) following changes in the rates charged the Commission by NCEMPA.

NCP Demand in Excess of Allocation - Where applicable, charges for demand in excess of Allocated NCP Demand, shall be computed based upon the difference between the Customer's maximum 15-minute demand recorded during the current billing month or minimum contracted billing demand, whichever is greater, and Allocated NCP Demand. These charges shall not be less than zero.

Energy - kWh of energy consumption shall be the total usage of electricity during the current billing month. The associated charge shall be equal to the energy rate charged to the Commission by NCEMPA for wholesale energy plus a 1.20% adjustment for the Customer's contribution to total system losses. This charge shall be automatically adjusted to track changes in the rates charged the Commission by NCEMPA.

$$\text{Energy Rate} = \text{NCEMPA energy rate} \times 1.012 \times 1.0$$

Interruptible Load - Load of a Commercial or Industrial (C&I) customer that such customer may elect to interrupt, curtail, or otherwise reduce, either on its own or at the request or direction of NCEMPA or the Commission.

Interruptible Demand - Beginning November 1, 2023, applies to any new C&I customer with Interruptible Load in excess of 1 MW or, existing C&I customers with a new Interruptible Load in excess of 1 MW. The monthly Interruptible Demand shall be the Customer's Total NCP Demand (defined as the sum of the Customer's Allocated NCP Demand and NCP Demand in Excess of Allocation), less the Customer's Coincident Peak Demand. Interruptible Demand shall not be less than zero in any month.

For interruptible loads under 25 MW,

$$\text{Interruptible Demand Charge} = \text{NCEMPA CP demand rate} \times 0.5$$

For interruptible load over 25 MW,

$$\text{Interruptible Demand Charge} = \text{NCEMPA CP demand rate} \times 0.7$$

rkVA Demand - rkVA Demand shall be the Customer's maximum 15-minute reactive demand recorded during the current billing month.

IV. NOTIFICATION BY COMMISSION AND LOAD CURTAILMENT BY CUSTOMER

In an effort to assist the Customer in reducing its monthly Coincident Peak (CP) Demand, the Commission will use diligent, good-faith efforts to identify potential Coincident Peak (CP) Demand periods and notify the Customer of such in advance. The Commission, however, cannot guarantee that identifications of these periods in all cases will be made, or that advance notice will be provided. The Customer will hold the Commission harmless in connection with such failures to identify these periods and/or provide advance notice, or with the Customer's receipt of and response to such notice.

Normally notice of potential Coincident Peak (CP) Demand periods will be provided by the Commission to the Customer by automated signal; such notifications may be supplemented by direct telephone or other modes of communication as deemed appropriate by the Commission.

Upon receipt of such notice, the Customer may utilize any means deemed suitable to reduce its Coincident Peak (CP) Demand, provided such means do not compromise the safety and well-being of its personnel, Commission employees, or the public, do not jeopardize or risk damage or harm to Commission-owned facilities, and do not interfere with or disrupt the provision of service by the Commission to its other customers.

In the event that the Customer elects to use generation to reduce any portion of its monthly demand, the installation and operation of such generation must be approved in advance and must conform to all applicable Commission standards and guidelines as outlined in Electric Rider RR-1, Qualified Customer Generation Policy. Such generation may be subject to metering by the Commission. Any additional costs incurred by the Commission associated with the operation of such generation shall be passed through directly to the Customer.

V. ADDITIONAL CONDITIONS

Participating customers are required to enter into a separate agreement covering service under this schedule. Except where otherwise provided by separate agreement, the Commission reserves the right to alter, amend, or discontinue service under the terms of this schedule in accordance with its rate making and rate administration standards. Where such alterations, amendments, or discontinuance occur, the Commission will endeavor to provide thirty (30) days advance written notice to the Customer. In the event of discontinuation, the Commission will provide the Customer with alternative schedule(s) under which to receive service.

Electric Rate Schedule EG-4
Large General Service-CP

The advance written notice provision is exclusive of tracking adjustments associated with changes in the rates charged the Commission from NCEMPA; the Commission will however endeavor to notify the Customer of such changes as soon as practical after such changes are approved and adopted by NCEMPA.

VI. PAYMENTS

Bills are due when rendered and are subject to a 1% penalty if not paid by the due date. For additional information, refer to Utility Regulations, Part D, Customer Service Policy.

TERM OF CONTRACT

The term of contract for service under this schedule shall be as mutually agreed upon, but not less than one (1) year.
