

**GREENVILLE UTILITIES COMMISSION**

**GREENVILLE, NORTH CAROLINA**

**QUESTIONS AND ANSWERS FOR #18-41, RFB FOR SANITARY SEWER OUTFALL &**

**WDTL ROW CLEARING**

**DATE DUE 8/8/2018**

**Questions**

Will there be any large tree removal? I only asked as the RFB stated that the Grounds person must be knowledgeable in ropes and knots.

Approximately how many miles or acres of mowing are expected this year?

My company has a Marsh Master equipped with a bush hog that we use for extremely wet areas (swamps).

Can the Marsh Master be used in these areas? If so how can we list it on the RFB?

Will there be opportunity for prospective bidders to visit the area where the work is to be performed?

How many miles were to be mowed?

**Answers**

As far as tree removal, there may be a tree or two that needs to be removed. I'm not sure until we actually get on the easements. There are around 44 miles of outfall that needs mowing. The Marsh master I am not familiar with but we do have some very wet areas. We usually mow those areas with our weed eaters. I'm pretty sure they can use the marsh master if needed. Opportunity to visit area is not available at this time, 8/7/18.
