

QUESTION AND ANSWERS II FOR:

RFB # 19-58, 1/30/20 FOR

GAS LEAK DETECTION

Question:

Will Utility Cloud require us to use your MDM?

Answer:

Utility Cloud is a web-based platform that can be accessed from most any device with the connection to the internet. Each survey technician will be provided with a log-in and user profile based on their unique email address. From the Utility Cloud website, the survey technician will be able to view location of gas main and services, track location during the leak survey, and log any leaks or meter maintenance found during the survey.
