

## **REQUEST FOR PROPOSALS**

Greenville Utilities Commission (GUC) is seeking professional technical services associated with the rehabilitation and repair of the headworks facilities at the wastewater treatment plant (WWTP) due to H<sub>2</sub>S corrosion. Improvements include but are not limited to the analysis of all existing structural components and design of recommended improvements, replacement of a Eutek Headcell, analysis of all electrical components and design of recommended improvements, and an evaluation of the existing odor control system at the headworks facility. The WWTP is located at 240 Aqua Lane, Greenville, NC. Proposals are due no later than 4:00 PM on March 27, 2020. Responders are advised that the Greenville Utilities Commission has a two percent participation goal for MBE/WBE firms for professional services. Interested firms may obtain the Request for Proposals from or direct questions to Tyler Haislip at Greenville Utilities Commission, PO Box 1847, Greenville, NC 27835, telephone (252) 551-1494 or email [haislitj@guc.com](mailto:haislitj@guc.com).
