

GREENVILLE UTILITIES COMMISSION

GREENVILLE, NORTH CAROLINA

QUESTIONS AND ANSWERS I, #20-27, RFQ FOR ENGINEERING

SERVICES FOR GAS DISTRIBUTION SYSTEM IMPROVEMENTS

1. This Request for Qualifications requires a schedule of rates charged on an hourly basis. Does GUC request to see estimated total costs of services related to this specific project?

Please provide only your standard hourly rates. Do not include any information on estimated cost of services.

2. This Request for Qualifications covers comprehensive engineering services. Should submittals include qualifications, project examples, and a rate schedule for personnel for construction management and/or inspection services, or will that be sourced through a separate RFQ/RFP?

We anticipate construction management and/or inspection services will be handled with in-house staff.

3. Regarding the Forms at the back of the RFQ, these are not listed in the Proposal Requirements section. Should we assume these two forms are necessary?

Yes, Pages 10 and 11 of the RFQ must be completed and included with your response. These pages will not count towards the maximum allowable pages.

4. The page count specifies double sided printing, no more than 40 pages. I am assuming this means pages 1-40 on 20 sheets of paper, front and back (NOT pages 1-80 on 40 sheets of paper)?

Correct, a maximum of 20 sheets printed front and back.

Note: Answers in Red.
