

Questions and Answers For Proposals For One Shelter
Issue Date August 24, 2020
Response Due Date, September 16, by 3:00 PM (EDST)

Questions:

You are requiring a site plan, the address listed is 240 Aqua Lane, which appears to be the whole WWTP campus. Can you provide a more precise location? How much area/site do we need to incorporate into the site plan? Are drives or parking areas required? Gates? Utilities? Clearing involved? Drainage requirements? Etc.

The building structure needs to be "Red Steel", that means just the primer on the building frames from the metal building company, correct? No finish painting?

Answers:

This is correct we do not need any clearing, drainage, parking, gates etc.

Just a metal shelter in the area Jason has marked with concrete footers.

Please see the area in white:
