

QUESTIONS AND ANSWERS I

Questions that were received concerning the **RFB 14-16**:

Page 4 – Data sheet indicates that the pump will not be Submersible but the motor enclosure indicates Submerged Motor. Please could you clarify your exact requirements?

The pump and motor assembly will not be submersible in cryogenic LNG or other liquid. The motor is to use the LNG it is transferring to act as a cooling agent for motor longevity, while, minimizing start-up and downtimes. The pump and motor is to be fully flooded with liquid.

Page 7 – The bid document states that we should only submit the bid document and any exceptions but on page 5 you are requesting certain documents be submitted with our proposal.

Vendors should complete and return pages 6,7,8,9
