

QUESTION AND ANSWERS FOR:

RFB # 14-37, 10/23/14

1500 LOAD MANAGEMENT SWITCHES

Question: I have gone over the table of compliance and all is understood except the reference to File E73065. We are UL916 compliant which encompasses a lot of other UL specifications but I cannot find a clear reference to E73065. SGS does our UL and FCC approval testing and they did a search for me with no results. They speculate that this is an older file that has been rewritten into UL 916 or deleted altogether. Please forward this to Engineering to get a reading on what this is all about.

Answer: As long as it's compliant with UL 916 and FCC we are ok with it.
