

QUESTION AND ANSWERS FOR:

RFB # 15-52, 10/21/15

ONE (1) DUMP TRUCK

Pre-Bid Meeting 10/6/15.

Attendees:

Cleve Haddock, GUC

The following questions/comments were brought up during the Pre-Bid Meeting today at 10:00 a.m.

Submitted via e-mail by Maury Rice, Carolina Freightliner of Raleigh, LLC

I will not be there tomorrow for the pre-bid on the CNG dump truck but wanted to let you know of a couple of recommended changes.

1. The dump floor needs to be 1/4" AR450 steel (per Godwin)
2. The front axle needs to be a min. 12k (per Freightliner) for the load imposed by engine and CNG tanks.
3. Recommend 60 gallon DGE fuel capacity to increase MPG range. (you can only get 80%+/- useable)

Response:

1. Per specifications, a minimum of 1/2" steel plating in floor of body. (1/2" is the minimum requirement)
2. 10,000 lb. front axle is a minimum requirement. (12K may be submitted on the Exception/Variation Bid Form.)
3. 45-gallon fuel tank is a minimum requirement. (60 gallon may be submitted on the Exception/Variation Bid Form.)
