QUESTIONS AND ANSWERS FOR 23-02

RFB FOR SUPPORT CLAMPS, SERVICE TEES, STAB COUPLINGS & REPAIR COUPLINGS

1/12/2023 at 3:00PM

1. I am hoping that you may have a detailed drawing or a detailed spec for the last couple items on the bid (TEE, EFTT/EFV KITS). Any further detail that you could provide on these items would be greatly appreciated.

We don't have detailed drawings. Please see further Specifics below.

These are kits that are assembled for us –

1 – Electrofusion tapping tee (various sizes for main, all have ¾" outlet), PE 4710 ASTM D2513, SDR11, PE2406 Compatible

1 – ¾" Excess Flow valve, 1,100 SCFH trip flow rate butt fused to the tapping tee, PE 2708/4710 ASTM D2513, SDR11, PE2406 Compatible

2 – ¾" Electrofusion couplings, PE 4710 ASTM D2513, SDR11, PE2406 Compatible

3 – Alcohol Wipes, 96% or greater isopropyl alcohol

1 – EFV metal tag that attaches to meter bar and 2 zip ties, denotes the
