RFP FOR GAS LEAK DETECTION & ATMOSPHERIC CORROSION SURVEY SERVICES

2/14/2023 at 11:00AM

1. Just for clarification purposes, is it 750 miles of distribution main line plus an additional 494 miles of commercial, industrial, and domestic service lines that need to be surveyed for a grand total of 1244 miles? I wasn't sure if the 494 miles were included in the 750 miles or were additional?

The 750 miles of main does not include the 494 miles of service lines. The total length to survey is 1,244 miles of pipeline.
