RFB FOR WIRE & COMPRESSION LUGS

12/11/2025 @ 2:00 PM

1. Is the only requirement for the compression lugs that they accept the proper size copper conductor? Other specs could be: stud size, dual rated or copper only, long or standard barrel, etc.

We need a 2-hole lug that will accommodate the 750 copper.

2. Would you happen to have the GUC # for the Lugs please?

We do not stock this item.
