

GREENVILLE UTILITIES COMMISSION
QUESTIONS AND ANSWERS II FOR RFB 26-49
FOR GALVANIZED TUBULAR STEEL STRUCTURES
8/25/2026 @ 2:00 PM

1. Could you please provide loading information for the engineered poles in this request?

The loading reports for the engineered structures can be produced using the .bak & .lca files we have provided. This is assuming they use PLS-CADD. We have attached .pdf files in case they do not.

2. What is GUC's desired delivery date for the tubular steel structures?

We do not have a firm date. It is up to the bidder to give us a lead time for this project.
