

GREENVILLE UTILITIES COMMISSION
QUESTIONS AND ANSWERS FOR
RFB 21-67 FOR ONE COPIER – NETWORK PRINTER
12/14/2021 at 3:00 PM (EDST)

Questions:

1. Book copy: Are you referring to a booklet finisher?
2. Speed: What speed system? We are thinking 55+ due to volume. If you have the current model in place we can use that as a reference.
3. BW or Color machine?

Answers:

The model we have now is a Canon 9280 that can create simple folded/saddle stitched books. 8.5 x 11 is 70-80 ppm

Questions:

4. Question regarding the RFP that was sent out. The way your current machine is configured, there is a software addition called a FIERY for marketing materials including exact color matching and saved jobs for frequently printed materials. Included in the RFP, I do not see this requirement so I wanted to see if this new device would need the addition.

So, do you want “Fiery’ or not?

Answers:

No.
