

GETTING NEW
SERVICES?

STAY SAFE!

We are often asked if customers need to be home when their services are connected.

- If you're getting natural gas service connected, you must be home when it's connected.
- For your safety and protection of your personal property, we also encourage you to be home when your electric and water services are connected.
- Make sure all heat-producing appliances (stoves, ovens, toasters, space heaters, clothes dryers, hair dryers, etc.) are off or unplugged before your electricity is turned on.
- You should also make sure that all water connections (faucets, ice makers, washing machine hookups, etc.) are completely off when your water is turned on.

If you have questions, please call us at 252-752-7166.
